

Professional sprayers for cannabis plants

# Efficient and effective spraying for healthy plants and high yields

## Eliminate pests through professional treatment

Efficient treatment requires three things: the right liquid, the right device, and the right application. This must be carried out over the entire area and without gaps, using enough active ingredient.

Our range is uncompromisingly configured for the treatment of pests ...

- Spider mites
- Thrips
- Aphids
- Whitefly
- Black fungus gnats
- Caterpillars
- Mildew

## Indoor and outdoor treatment – efficient with Birchmeier

Compression, backpack and two-wheel sprayers with special nozzles produce fine – but not too fine – droplet sizes for ideal leaf wetting (under and surface).

### With our «Accu-Power» sprayer line, combined with the AS 1200 spray blower, even larger areas can be treated quickly and effectively

With pressure-controlled pre-spraying and an adjustable air stream, the AS 1200 achieves a maximum liquid transportation over the required distance. Thanks to the air support, the underside of the leaf is also optimally wetted.

- Adjustable air stream
- Defined pre-spraying
- Configurable flow rate
- Evenly distributed droplet spectrum
- Optimum target penetration
- High level of target area efficiency
- Improved use of active ingredients

### Birchmeier sprayers for professionals

- The right device and nozzle for every application
- Easy to use, great flexibility
- Optimal spray pattern for optimal wetting
- Large product range up to 34 gal capacity
- High resistance to pesticides

#### Advantages of battery-powered sprayers

- Very high mobility
- Simple, one-handed operation
- Better results thanks to special nozzles
- Comfortable carrying of backpack sprayers
- Tank volume 1 to 34 gal
- Flow control thanks to electronic pressure control
- With AS 1200 spray blower ranges up to 33 ft
- CAS battery technology – Cross-manufacturer compatibility (40 brands, 400 devices, 1 battery)

ACCU  
POWER

Two-wheel battery sprayer
