Marcelo Garten GmbH, Zürich

Head gardener Marcel Lehmann

Larger trees can be sprayed from the ground easily. The airstream is perfect for an optimal penetration into the box trees. Besides that, the expenditure of time reduces about 20% and the spray liquid consumption reduces about 40%.

Application details

Device:	AS 1200 with REC 15
Nozzle:	AITXA 8002 VK (yellow)
Airspeed level:	1 – 2 (roses), 3 – 4 (trees)
Pressure REC 15:	2 – 6 bar
Spray liquid:	Biological spray liquid against box tree moth, chestnut moth and fungi (roses, winter spraying)
Area:	Selective up to approx. 100 m ²
Spray liquid consumption:	Varies

Result / conclusion of Marcel Lehmann:

- The AS 1200 is used for several applications (gardenkeeping for private homes).
- Larger trees can be sprayed from the ground easily (chestnut trees, winter spraying).
- The airstream is perfect for an optimal penetration into the box trees.
- The advantage of the AS 1200 is in the efficiency (time reduction about 20%) and in the spray liquid consumption too (40% less).
